See accompanying notes to consolidated financial statements

**WESCAN GOLDFIELDS INC.**

(A Development Stage Entity)

**Notes to the Consolidated Financial Statements (for the three-month period ended March 31, 2010)**

**1. Nature of operations and going concern**

Wescan Goldfields Inc. was originally incorporated as Shore Resources Inc. under the Business Corporations Act of Alberta on January 17, 2003 and by amended articles dated April 2, 2004 changed its name to Wescan Goldfields Inc. (“Wescan” or the “Company”). Substantially all of the Company’s efforts are directed to the exploration and development of its mineral properties and the Company is considered to be in the development stage with respect to its current mineral property holdings.

The Company is in the process of exploring its mineral properties and has not yet determined whether the properties contain economically recoverable mineral reserves. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable mineral reserves, the ability of the Company to obtain the financing necessary to complete exploration and development and the success of future operations.

These financial statements are prepared on the assumption that the Company will continue as a going concern and realize its assets and discharge its liabilities in the normal course of business. At March 31, 2010, the Company had a working capital deficiency of \$527,823 and does not have sufficient resources to finance operation and exploration activities through its 2010 fiscal year, conditions which raise substantial doubt about the Company’s ability to continue as a going concern. The ability of the Company to continue as a going concern, to extinguish current liabilities, fund exploration expenditures in an orderly manner and provide funds for ongoing general and administrative costs will require further equity issues in 2010 which are currently being pursued.

These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and liabilities that might be necessary should the Company be unable to continue as a going concern.

**2. Significant accounting policies**

Basis of presentation

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and follow the same accounting principles and methods of application as the most recent annual audited consolidated financial statements. These consolidated financial statements should be read in conjunction with the Company’s annual audited consolidated financial statements filed on SEDAR.

**3. Changes in accounting policies and new accounting pronouncements**

International financial reporting standards

In February 2008, the Accounting Standards Board (“AcSB”) confirmed that Canadian GAAP for publicly accountable enterprises will be converged with International Financial Reporting Standards (“IFRS”) effective in calendar year 2011. The Company’s first financial statements presented in accordance with IFRS will therefore be the three-month period ended March 31, 2011. Though IFRS uses a conceptual framework similar to Canadian GAAP, there are some significant differences on recognition, measurement and disclosure requirements. The International Accounting Standard Board (“IASB”) has several projects currently underway to change standards however, no significant changes are expected to be mandatory earlier than 2012. If early adoption for any new or amended IFRS that might be issued during 2010 is permitted, the Company would have the option of applying these new standards on changeover (and for 2010 comparatives).

**WESCAN GOLDFIELDS INC.**

(A Development Stage Entity)

**Notes to the Consolidated Financial Statements (for the three-month period ended March 31, 2010)**

As a result of this convergence, the Company has developed a plan to convert its financial statements to IFRS. Management has not yet completed its quantification of the effects of adopting IFRS. The consolidated financial performance and financial position as presented in the Company's Canadian GAAP financial statements may be significantly different when presented in accordance with IFRS.

**4. Mineral properties**

Mineral properties are made up of the following:

	December 31, 2009	Exploration Costs	March 31, 2010
Munro (a)	\$ 364,526	\$ -	\$ 364,526
Jojay (b)	3,057,380	-	3,057,380
Hudson Bay/ Pinehouse Lake (c)	3,403,079	47,220	3,450,299
Total	\$ 6,824,985	\$ 47,220	\$ 6,872,205

The Company has not yet determined whether any of its mineral properties contain economically recoverable reserves. Amounts capitalized as mineral properties represent costs incurred to date and cost of properties acquired, less write-downs and does not necessarily reflect fair values.

a) Munro Property

The Company holds an 86.5% interest in the Munro property, consisting of certain mineral dispositions located approximately 128 kilometers northeast of La Ronge, Saskatchewan.

b) Jojay Property

The Company holds a 100% interest in the Jojay property, consisting of certain mineral dispositions located approximately 150 kilometers northeast of La Ronge, Saskatchewan.

c) Hudson Bay/Pinehouse Lake

The Company holds a 100% interest in 331 coal permits that comprise a total area of 229,280 hectares (2,292 square kilometres) and are in close proximity to Hudson Bay and Pinehouse Lake, Saskatchewan.

**5. Future Income taxes**

The Company finances a portion of its exploration activities through the issuance of flow-through shares. During the first quarter of 2010, the Company renounced the deductions to investors and accordingly recorded share issue costs related to the future tax liability of the temporary difference arising from the renunciations. As a result, share capital was reduced and future income tax liabilities increased by the estimated tax cost of the deductions renounced by the Company to the investors in the amount of \$163,336.

**6. Share capital**Authorized

The authorized share capital of the Company consists of an unlimited number of common shares.

The common shares of the Company are entitled to dividends prorated and when declared by the Board of Directors and to one vote per share at meetings of the shareholders of the Company. Upon dissolution or any other distribution of assets, the shareholders are entitled to receive a pro-rata share of such distribution.

**WESCAN GOLDFIELDS INC.**

(A Development Stage Entity)

**Notes to the Consolidated Financial Statements (for the three-month period ended March 31, 2010)**Issued and outstanding

	Common Shares	Amount
Balance - December 31, 2009	80,115,483	\$ 15,026,429
Future income taxes on renunciation of flow-through shares (a)	-	(163,336)
Balance - March 31, 2010	80,115,483	\$ 14,863,093

a) Flow-through shares

In July 2009, the Company issued 2,749,756 flow-through shares for gross proceeds of \$604,946. The shares issued require that the Company make certain qualifying expenditures for tax purposes on or before December 31, 2010; the deduction of which flows through to the shareholder. As a result, the Company reduced share capital by the tax effect of the renunciation. At March 31, 2010, all expenditure commitments had been met related to this financing.

b) Warrants

On certain issues of common shares, the Company has issued warrants with the common shares entitling the holder to acquire additional common shares of the Company. As at March 31, 2010, the Company had 870,750 warrants outstanding with an exercise price of \$0.30 which expire in August 2010.

c) Broker warrants

On certain issues of common shares, the Company issued broker warrants as partial consideration to the agent for services associated with the share issuance. Each broker warrant entitles the agent to acquire one common share of the Company for a period of 12 months from closing. As at March 31, 2010, the Company had 170,826 broker warrants outstanding with an exercise price of \$0.30 which expire in July 2010.

d) Share option plan

The Company has established a share option plan whereby options may be granted to directors, officers, consultants and employees to purchase up to an aggregate of 10% of the issued and outstanding shares of the Company. Options granted have an exercise price of not less than the closing price of the common shares on the stock exchange on which the shares are traded prior to the date on which the options were granted. Certain options vest immediately while others vest six to twenty-four months after grant date and expire five years from the date of the grant of the options.

During the quarter ended March 31, 2010, no options were granted by the Company.

The fair value of options vested and expensed from options granted from previous years was \$6,532 (2009 – \$9,446).

As at March 31, 2010, the Company had 5,440,000 options outstanding with a weighted average exercise price of \$0.42 which expire between May 2010 and April 2014.

**WESCAN GOLDFIELDS INC.**

(A Development Stage Entity)

**Notes to the Consolidated Financial Statements (for the three-month period ended March 31, 2010)**

e) Contributed surplus

The fair value of stock options has been valued using the Black-Scholes option-pricing model. The fair value of these securities is added to contributed surplus over the vesting period of the securities. Upon exercise, the corresponding amount of contributed surplus related to the security is removed from contributed surplus and added to share capital. A summary of the contributed surplus activity is as follows:

	Amount
Balance - December 31, 2009	\$ 1,643,855
Fair value of options vested	6,532
Balance - March 31, 2010	\$ 1,650,387

**7. Related party transactions**

During the year management and consulting fees of \$20,500 (2009 – \$18,000) were paid or payable to companies controlled by certain officers of the Company; \$20,500 (2009 – \$18,000) of these fees were included as administration expense. As at March 31, 2010, accounts payable includes \$43,200 (2009 – \$18,900) due to these companies.

As at March 31, 2010 Shore Gold Inc. holds 12,955,567 (2008 – 12,955,567) common shares of the Company representing a 16.2% (2009 – 17.2%) interest in the Company.

During the three month period ended March 31, 2010, the Company was charged \$8,920 (2009 – \$12,889) by Shore Gold Inc. for administration services and rent. Accounts payable includes \$17,816 (2009 – \$23,467) due to Shore Gold Inc.

The above transactions were in the normal course of operations and are measured at an amount agreed to by the related parties.

**8. Financial instruments**

As at March 31, 2010, the fair value of all the Company's financial instruments approximates their carrying value. Certain financial instruments are exposed to the following risks:

a) Credit risk

Credit risk is the risk of an unexpected loss by the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk primarily relates to accounts receivables and is not considered significant.

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. As at March 31, 2010 the Company believes it will have sufficient access to financial markets to continue to fund its financial liabilities through future equity issues.

The Company does not currently operate any producing properties and as such, is dependent upon the issuance of new equity to advance its exploration properties. Although the Company has been successful in the past in obtaining financing, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain additional financing on a timely basis may cause the Company to postpone development plans, forfeit rights in its properties or joint operations or reduce or terminate its operations. Reduced liquidity or difficulty in obtaining future financing could have an adverse impact on Wescan's future cash flows, earnings, results of operations and financial position.

**WESCAN GOLDFIELDS INC.**

(A Development Stage Entity)

**Notes to the Consolidated Financial Statements (for the three-month period ended March 31, 2010)**

c) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company does not have any significant exposure to interest rate risk.

**9. Contingency**

A statement of claim has been filed against the Company for unpaid expenditures of \$278,946 related to an exploration program. A response to the claim has been made. At this time, the likelihood of the claim is not determinable.

**10. Subsequent event**

On May 10, 2010, the Company announced the completion of the first tranche of a private placement financing consisting of an aggregate of 3,461,539 units of the Corporation ("Units") at a price of \$0.13 per Unit, for gross proceeds of \$450,000. Each Unit consists of one common share, and one half of one common share purchase warrant (each a half "Unit Warrant"). Each whole Unit Warrant entitles the holder thereof to purchase one Common Share at a price of \$0.22 for a period of 12 months from the date of issuance.
